Since 1983,
Oregon's First Responders and EMT's have had OSPA representing them on various state issues.

Our Mission:
Provide information, promote communications, share ideas, and encourage and assist Oregon's First Responders and Emergency Medical Technicians of all levels in providing the highest quality service.

Our Strength:
With nearly 10,000 EMTs and First Responders in Oregon, we are a considerable segment in our state's medical community.

Be part of your profession. Have your voice heard.

Stop by our booth at the conference, e-mail Gary McLean at Pres@OregonEMS.Org, call 503-668-3064 for information, or fill out the application below and mail to OSPA Membership. Join OSPA today!

ZOLL M Series
Defibrillator Monitor Pacemaker

Same lightweight unit. Dynamic new powers.

When you are off to the rescue, you need a lot of capabilities. 12-lead. EtCO₂. AED. Pulse Oximetry. And Rectilinear Biphasic waveform. Get them all in one small unit. The M Series. Ready to go anywhere. Easy to use anytime. Equipped to handle any situation. The M Series Defibrillator Monitor Pacemaker. It’s eleven pounds of superpower. From ZOLL. Call 800-348-9011 or visit www.zoll.com

©2000 ZOLL Medical Corporation, Burlington, MA 01803
THURSDAY SEPT. 11 - PRE-CONFERENCE SESSION DESCRIPTIONS

How comfortable are you when transporting the newborn and pediatric patient? Emanuel Children’s Transport Team will be offering hands-on skill stations for:
- Airway management/ Endotracheal Intubation
- Non-Invasive Airway support/ Laryngeal Mask Airway placement
- Vascular access/ Intraosseous placement
- Diagnosis and treatment pneumothorax/ Cricothyroidotomy

Presented by: Gina Craven RN, Teresa Patton RN, Renee Rich RN, BSN, Michael Belair RRT, and Louise Baxter, MD

Pediatric Neo-Natal Skills
Presenter: EMANUEL PEDIATRIC TRANSPORT TEAM
4-HOUR WORKSHOP
MORNING OR AFTERNOON
8:00 AM – 12:00 PM
1:00 PM – 5:00 PM

Traumatic Brain Injury
Presenter: DONNA WILSON, EMT-P
4-HOUR WORKSHOP
MORNING OR AFTERNOON
8:00 AM – 12:00 PM
1:00 PM – 5:00 PM

Medical Directors Workshop
Moderator: JERRY ANDREWS, EMT-P
Educational staff will be represented from DHS-EMS.
9:00 AM – 4:00 PM

Advanced Invasive Skills
Presenter: BILL PORTER, RN, EMT-P, MICHELE MOORE, RRT, EMT-P AND HELENKA MARCINEK, MD
8:00 AM – 5:00 PM
SPONSORED BY AIR LIFE OF OREGON

Invasive Skills Lab with an emphasis in critical care and education, and is not a testing environment. The stations with include External jugular and Femoral Vein Cannulation, Needle Chest decompression and Chest tube insertion, Chest X-ray interpretation, Intraosseous insertion (including Sternal), advanced airway management and 12 lead ECG interpretation. The airway station will include: Bougie, LMA, Combitube and ET tube insertion. Your techniques will be video taped and you will be given the tape. The 12 lead interpretation class will be in a separate area and in about an hour we will have you recognizing an Inferior MI without the help of the computer in your monitor.

Emergency Medicine
The True Darwin Awards by
Dr. Matthew Eschelbach
Thursday night
7:00 – 10:00 PM
At Eagle Crest Resort

Come hear a lively discussion about emergency treatment of patients in the new millennium. Case histories from EMS, ER, and trauma will be presented and discussed for their emphasis on the lighter side of medicine as well as their ability to highlight how patients manage to harm themselves in interesting ways. Help us pick the winner of the EMS Darwin awards.

EMS providers are welcome and admitted free of charge to this presentation. No host bar available.
EMS Conference 2003 Workshops: September 12–13

All workshops will take place at Deschutes County Fairgrounds Expo Center in two large conference rooms. Room designations will be available onsite.

**CONFERENCE ENDS**

---

We proudly salute our brave EMS colleagues.

The Oregon Health & Science University Department of Emergency Medicine  
*Where Healing, Teaching & Discovery come together.*
**FRIDAY SEPT. 12 - CONFERENCE WORKSHOP DESCRIPTIONS**

**KEYNOTE: FINDING HUMOR IN THE CRAZY WORLD OF EMS: WELCOME TO THE DARK SIDE**  
STEVE BERRY

Those working in the field of emergency medicine often times have to respond to scenes involving horrific trauma and death, and yet they must not only keep working the remainder of their shift, but they must do it again the next day and the next. How do they do this? For many, gallows humor offers a momentary respite from their sense of loss and pain. Most people outside of our profession view this as going beyond the bound of good taste. However, we know that in spite of such tragedies, amusing incidents happen anyway, and that sometimes humor is the only weapon we have. Sometimes its just an inner chuckle that tells us, “we’ll get through this.” We all need to sharpen our senses on calls. Join Steve as he encourages us to enhance our sense of healthy humor, while touching your heart with hope and understanding.

**Devastating Facial Trauma**
Presenter: KIYA MOVASSAGHI, MD  
10:00 AM – 11:00 AM  
REPEATED 2:40 PM – 3:40 PM

Facial trauma can potentially cause devastating facial injuries. Dr. Movassaghi will share some of his most challenging facial trauma cases. He will discuss field management that will facilitate recovery for these patients and the surgical management of each case.

**Natural Causes, Accident or Child Abuse? Pediatric Assessment Tips for Emergency Medical Responders**
Presenter: SUSAN REICHERT, MD  
10:00 AM – 11:00 AM

Those professionals first on the scene of a pediatric emergency are in a unique position to make critical observations that can assist in the determination of cause of injuries or death. This presentation will offer attendees an opportunity review or become familiar with red flags that may signal abuse. Pertinent features of the scene as well as physical and historical characteristics of abuse vs non-abuse will be discussed. Examples will range from fractures and observable skin injuries to more serious internal trauma, head trauma and SIDS.

**Pediatric Emergencies for the Advanced Provider**
Presenter: Daniel Hull, MD, FAAP, FACEP  
11:10 AM – 12:10 PM

We will look at the child from the uniqueness of the pediatric patient. We will consider anatomy, the airway, problems encountered in intubations, use of intraosseous lines, and the mechanism of injury and disease. We will consider stealth presentations for both medical and surgical processes. The lecture will be very visual and will contain significant case presentations when appropriate.

**Down the Bumpy Road - Keeping Kids Alive During Transport**
Presenter: JEFF DISNEY, MD  
11:10 AM – 12:10 PM

Rural EMS transports present a unique environment for the severely ill or injured pediatric patient. This hour will introduce BLS pre-hospital stabilization, life-threatening inter-facility concerns, and tricks-of-the-trade for Basic and Intermediate EMT’s who care for the pediatric patient.

**Geriatric Depression and Suicide**
Presenter: STEVE BERRY, BA, NREMT-P  
1:30 PM – 2:30 PM

The elderly are more at risk for depression and suicide, due to the losses they experience, including; retirement, the death of a spouse and/or a close friend, cognitive impairment, decreased mobility, and medical illness. However, depression is not an inevitable outcome. There is much more that can be done from the standpoint of prevention and treatment. These efforts require a partnership, between the patient, physician, and yes, pre-hospital care provider. This class will help you identify those clinical characteristics of depression and suicide for those elderly patients who are at risk, and how to get them the help and hope the need.
FRIDAY SEPT. 12 - CONFERENCE WORKSHOP DESCRIPTIONS

Toxidromes and Overdoses
Presenter: MATTHEW ESCHELbach, DO
4:10 PM – 5:10 PM

A discussion of common and not so common overdoses and toxidromes in EMS. Learn how to recognize the most common side effects of poisonings as well as ways to treat these often difficult patients.

Abdominal Trauma
Presenter: ANDREW MICHAELS, MD, MPH, FACS
1:30 PM – 2:30 PM

Altered mental status represents one of the most common, yet challenging adult and pediatric EMS calls. However, there is a simple and fast way to figure out what’s going on and initiate proper treatment. Give Dr. Disney 45 minutes, and he’ll show you the 2-minute prehospital workup! And we’ve thrown in “Sudden Syncope” as a bonus!

Combative, Crazy, Convulsing or Compromised?
Presenter: JEFF DISNEY, MD
2:40 PM – 3:40 PM

This unique presentation will provide a forum for exchange of information and ideas related to the development of pain, its expression, assessment, and management in the prehospital setting. Learn reliable assessment tools for unique patient populations. Discover what aspects of child development should be taken into account when assessing a child’s pain and selecting a pain treatment plan. Find out what specific barriers to effective analgesia and pain research exist. Last learn why improving the networking among researchers and clinicians is so important and why stimulating pain-related research scientists, clinical researchers, physicians, nurses and prehospital providers in North America with interest in the development of pain and the assessment and management of pain will overall improve care received by our patients.

Pain Management in the 21st Century
Presenter: JOHN McMANUS JR., MD
4:10 PM – 5:10 PM

A discussion of common and not so common overdoses and toxidromes in EMS. Learn how to recognize the most common side effects of poisonings as well as ways to treat these often difficult patients.

Toxidromes and Overdoses
Presenter: MATTHEW ESCHELbach, DO
4:10 PM – 5:10 PM
SATURDAY SEPT. 13 - CONFERENCE WORKSHOP DESCRIPTIONS

KEYNOTE: THE ART AND SCIENCE OF EMS in 2003
DR. EDWARD RACHT
8:00 AM – 9:30 AM

We live in a time of amazing changes and extraordinary challenges. Our communities depend on us to “take care of them”. We struggle with a changing economy, a more threatening environment, changing roles and new, emerging diseases. While the “new world” seems daunting or haunting, this is exactly where EMS shines. We have an amazing ability to “solve the problem” — regardless of what it is. Learn about the Art & Science of EMS in 2003.

Basic and Intermediate Drug Box - Part I: What do these drugs really do?
Presenter: JAMES BRYAN, MD, PHD
10:00 AM – 11:00 AM

This scenario-based lecture will review drugs used by EMT-Basics and Intermediates. In addition to covering the rationale for using these medications, the discussion will focus on the side effects, contraindications, and controversies surrounding many of these medications. Audience participation will be encouraged.

Stress: The Cocaine of Modern America
Presenter: LEONARD MEES, MD
10:00 AM – 11:00 AM

Everyone has stress. It’s the lifeblood of American life, isn’t it? Equally, everyone decries the rampant use of cocaine. It’s bad! Both are addictive. Dr. Mees examines the myriad of physical and emotional risks associated with constant stress. While this presentation focuses on living a life that prevents stress from controlling us, it features the principles of stress management, and it implores the participant to develop his or her own best stress managers. The participant will leave feeling empowered and educated to manage stressors in his or her life.

Basic and Intermediate Drug Box - Part II: What do these drugs really do?
Presenter: JAMES BRYAN, MD, PHD
11:10 AM – 12:10 PM

This scenario-based lecture will review drugs used by EMT-Basics and Intermediates. In addition to covering the rationale for using these medications, the discussion will focus on the side effects, contraindications, and controversies surrounding many of these medications. Audience participation will be encouraged.

Interfacility Cases in Critical Care Transports
Presenter: RITU SAHNI, MD, MPH
11:10 AM – 12:10 PM

Interfacility transport of medical and trauma patients can represent some of the most complex management challenges in the out-of-hospital setting. This session will use an interactive case presentation to format to generate discussion about the assessment and management of complicated medical problems in the out-of-hospital environment. Discussion will also include pathophysiology and treatment options.

Agricultural Rescue - Part I
Presenter: BILL ALGUIRE, EMT-P
1:30 PM – 2:30 PM

Farming continues to be one of the nation’s most dangerous occupations. Daily exposure to a multitude of powerful and complex machinery leaves the farmer, farm family members and other farm workers vulnerable to a large variety of injuries. EMS response is critical in farm-related calls. Such injuries often occur in isolated areas and may involve entrapment by farm machinery or in structures that are difficult to enter. Learn how to make life-saving decisions concerning a large variety of emergencies found in the farming community.

Stroke in Oregon: Results of the 2002 Oregon Stroke Centers Prototype Registry
Presenter: KYLIE GORMAN, EMT-P, MBA
1:30 PM – 2:30 PM

Strokes in Oregon have increased at an alarming rate during the last 10 years. Oregon has one of the highest stroke death rates in the country. While we know some of the factors that are useful in treating strokes, we don’t know the factors that inhibit getting people to that care. The Oregon Stroke Centers Prototype Registry (OscPRey) has just completed a study of strokes in Oregon. The program will describe the most recent stroke data available in Oregon, and how EMS agencies fit into an overall plan to improve stroke care in the state. EMTs and paramedics, and urban and rural agencies can all benefit from understanding the roles EMS services in improving stroke outcomes.
SATURDAY SEPT. 13 - CONFERENCE WORKSHOP DESCRIPTIONS

Powerful and complex machinery, tractors, power take-off equipment, storage facilities, grain bins, animals, electrocution...all are very real dangers present on a farm. Enjoy Part II of Agricultural Rescue as you learn how to handle farm emergencies while keeping you and your injured victim from further danger.

A humorous journey through life’s ups and downs as we grow older in EMS. Not only is the field of medicine changing rapidly, but also is our ability to continuously meet the physical and mental demands it places on our bodies and minds. Techniques one can use to stay healthy in this, often-unforgiving profession of pre-hospital care, will be explored. As well as, a deeper appreciation of the caring needs of our elderly population.

Agricultural Rescue - Part II
Presenter: BILL ALGUIRE, EMT-P
2:40 PM – 3:40 PM

Pitfalls in Airway Management
Presenter: EDWARD RACHT, MD
2:40 PM – 3:40 PM

Aging Gracefully In EMS
Presenter: STEVE BERRY, BA, NREMT-P
4:10 PM – 5:10 PM

PRESENTERS

Bill Alguire has been actively involved in EMS for the past 25 years. His career has provided experiences in the Military, Aviation Medicine, Water Rescue, Commercial Ambulance Services, Fire-based EMS and EMS education. Mr. Alguire has traveled throughout Oregon and SW Washington since 1988 initially teaching “Farm Accident Rescue”. In 1991 he attended the National Training Center in New York and has been conducting the “FARMEDIC” provider course ever since.

Bill Alguire, EMT-P

Steve Berry, BA, NREMT-P
A former teacher and interpreter for the hearing impaired at the Colorado School for the Deaf and Blind in Colorado Springs. Steve has published eight EMS cartoon books, since his escapades as a paramedic and EMS instructor began seventeen years ago. Steve’s presentations for health and emergency service organizations are humor-based and are presented at local, state, and national levels. Steve works part-time for Pridemark Paramedic Services out of Arvada and the Broadmoore Fire Rescue Department in Colorado Springs. His cartoons and monthly humor column can be read each month in JEMS Magazine.

James Bryan, MD, PhD
Dr. Bryan holds doctorate degrees in medicine and pharmacology. He is an Assistant Professor of Emergency Medicine at OHSU and Assistant Chief of Emergency Medicine at the Portland VA Medical Center. Dr. Bryan has served as the Medical Director for the OHSU/OIT Paramedic Education Program for the past nine years, and he chairs the Multnomah County EMS Quality Assurance Subcommittee. He has presented multiple pharmacology lectures for EMT-Paramedics at previous conferences and now adapts his popular lecture for EMT-Basics and Intermediates.
## PRESENTERS

### Jeff Disney, MD

A Graduate of USUHS, the Military's Medical School, Dr. Disney spent 12 years with the US Navy as an Emergency Medicine Specialist. His experience is diverse, from Marine Corps Special Ops, to a past-member of the San Diego County Pediatric Emergency Medicine Committee. Currently, Dr. Disney is a community-based Emergency Medicine Specialist in Portland, a Senior Physician Advisor for Metro West EMS, and a part-time Clinical Faculty member in the Dept of Emergency Medicine at OHSU.

### Matthew Eschelbach, DO

Dr. Eschelbach is the Director of Emergency Medicine for Central Oregon Community Hospital in Redmond and an ED physician at Mountain View Hospital in Madras. He also serves as EMS Physician Advisor for Redmond, Lapine, Sunriver, Crescent, and Chemult EMTs and also as Medical Director for the EMS Oregon Conference.

### Kyle R. Gorman, EMT-P, MBA

Kyle is the executive officer of Clackamas County Fire District #1. Kyle serves on the NFPA 450 technical committee, which establishes guidelines for EMS system design, and on the professional development committee of the International Association of Fire Chiefs. He is the author of a number of articles on EMS system design, and is a lecturer and consultant on EMS throughout the United States.

### Daniel J. Hull, MD, FAAP, FACEP

Dr. Daniel Hull attended The University of Michigan Medical School, then went to UCLA and completed his residency in General Pediatrics, and an additional year of fellowship as Chief Resident in Pediatric at UCLA. He did a second residency in Emergency Medicine, at UCLA. For seven years was the Director of Pediatric Emergency Medicine at Emanuel Children’s Hospital. For the past three years, he has served as the director of Pediatric Emergency Medicine at Providence St. Vincent Medical Center and is board-certified in General Pediatrics, Pediatric Emergency Medicine, and Emergency Medicine. He is a PALS and ATLS instructor at Legacy Emanuel Hospital & Health Center.

### Helenka Marcinek, MD

Medical Director, Air Life Of Oregon. 1996 Oregon State Medical Director of the Year, Medical Director COCC Paramedic program, Medical Director Bend Fire Dept. A constant supporter of EMS with a vision for excellence in patient care.

### Leonard Mees, MD

A 1972 graduate of the University of Rochester School of Medicine and Dentistry. Leonard Mees, MD, practiced family medicine for 20 years, all the while knowing he should become a teacher, teaching a nation at health risk how to be healthy. Former Phoenix radio talk show host, author of two books, Get a Life, America! and A Change of Heart, and founder and director of Health Innovators International, a think-tank for health visionaries. Dr. Mees has been a full-time health educator and health promoter since 1994.

### John G. McManus, Jr., MD, FACEP

Dr. McManus is currently EMS Fellow and Adjunct Assistant Professor at OHSU Emergency Department. He has trained at the University of Washington and Madigan Army Medical Center and is an Army Emergency Medicine Physician (Major).
Registration Information

Pre-Conference Registration: Registration for pre-conference workshops at Eagle Crest Resort, must be submitted by September 1, 2003. Various sponsors have contributed generously to keep registration fees low. As such, we must confirm to the instructors and sponsors that sufficient numbers of participants are registered by the deadline date. REGISTER EARLY!

Conference Registration: To register for the conference, complete the form below and submit with fees to:

Portland Community College
Institute for Health Professionals, CPWTC #208
PO Box 19000
Portland, OR 97280-0990
Or register by fax to 503-731-6632 or by phone 503-731-6633
with approved credit card.

Payment for Registration: Registration for the conference workshops at Deschutes County Fairgrounds Expo Center is limited. Individuals registering late do so at their own risk. All registrations will be processed on a first-come, first-served basis. On-site registration will be accepted only if space permits. Registration must be accompanied by check, money order or approved credit card (VISA, MasterCard). Purchase orders can not be accepted.

Scholarships: We do not have scholarship information available at this time. Please continue to check with us, we are continually updating this form.

Refunds and Cancellations: Refunds will be given, less a $15 processing fee, if PCC-IHP is notified at the above phone number, mailing address, or FAX at least 10 working days prior to the start of the conference. Thereafter, no refunds will be issued. If you cannot attend, you may send a substitute in your place provided that PCC-IHP is notified 5 working days prior to the conference. Thereafter, no substitutions will be made.

## PRESENTERS

**Andrew Michaels, MD, MPH, FACS**

Dr. Michaels is certified by the American Board of Surgery in both Surgical Critical Care and General Surgery. He received his medical degree from the University of Pittsburgh School of Medicine in 1988, and an MPH from the University of Michigan in 1997. He completed his general surgery residency through Allegheny General Hospital/Medical College of Pennsylvania in 1995. In addition, Dr. Michaels was a Robert Wood Johnson Clinical Scholar, and completed fellowships in extracorporeal life support and trauma, burn and critical care.

**Michele Moore, RRT, EMT-P**

Ms. Moore is Educational Coordinator and Lead Flight RT, Air Life Of Oregon. Michele has produced many successful skills labs and has a passion for education — creating an environment for learning that is fun, and respectful of the student and their capabilities.

**Kiya Movassaghi, MD**

Dr. Kiya Movassaghi moved to Eugene, Oregon, in 2002 after 14 years in Boston where he completed his medical and surgical training at Harvard Medical School. His practice focuses on cosmetic surgery, as well as, adult and pediatric plastic and reconstructive surgery. He has authored numerous articles on various aspects of plastic surgery.

**Bill Porter, RN, EMT-P**

Clinical and Operations Manager, Air Life Of Oregon. Publisher of *Porters EMS Protocols*, *Porters Guide to Critical Care*, *Porters Guide to Pediatrics* and President Marz Communication. His skills are up to date and is actively working in the field and takes calls on a regular basis.

**Edward Racht, MD**

Dr. Edward Racht is a nationally recognized speaker who serves as the Medical Director for the City of Austin/Travis County Emergency Medical Services System in Austin, Texas. He has been involved in Emergency Medical Services for fifteen years and is active in the EMS at the state, national, and international level. Dr. Racht serves as a reviewer on *Academic Emergency Medicine* and the *Journal of Prehospital Care* and serves on the editorial board of *EMS Best Practices*. His research interests are cardiac arrest/resuscitation and EMS systems development.

**Susan Reichert, MD**

Susan K. Reichert, MD has specialized for over 12 years in the evaluation of sexually and physically abused children. She practiced general pediatrics for six years before returning in 1990 to the University of Colorado to complete a fellowship in child abuse and neglect. She has since served as Medical Director of the child abuse programs at Children’s Hospital Oakland and at the KIDS Center in Bend, Oregon. Dr. Reichert helped author the *Oregon Medical Guidelines for Child Sexual Abuse Evaluation* and will participate in the upcoming revision. She has regularly provided training and consultation and as a medical consultant for the Regional Centers in the State of Oregon.

**Ritu Sahni, MD, MPH**

Dr. Sahni has been Medical Director of Life Flight Network for the last year. He is an Assistant Professor of Emergency Medicine at OHSU as well an Attending Physician in the Legacy Emanuel Emergency Department. Prior to arrival at Life Flight, he was faculty at East Carolina University and Medical Director of EastCare, an air and ground critical care transport program.

**Donna Wilson, EMT-P**

Donna Wilson has been involved in Oregon EMS since 1988. From 1994 to 1999 she served as Oregon’s only Mobile Training Unit (MTU) Coordinator when one additional unit was added, improving services to rural Oregon communities.
